

Victor Garcia's AI Visibility Report

structupath.ai + fsw-denver.com · Audited 2026-09-15 · structural steel fabrication (Flawless Steel Welding) and AI-native construction tooling (StructuPath)

FULL SCORE · ALL 5 PILLARS

79/100 B → 90/100 projected after fixes

Every number here is from a live test, not an estimate
10 real buyer questions (5 per venture) plus 4 additional narrower checks were run live against ChatGPT, Claude, Perplexity, and Gemini — not approximated. Both structupath.ai and fsw-denver.com were tested independently.

WHAT AI SEES ABOUT YOU NOW
Across 10 real buyer questions spanning both ventures, Victor is cited on 7 of 10 — the strongest real result of any Specularis prospect tested. Two additional narrower checks confirmed StructuPath is already the clear answer on RFI automation and NCR tracking for structural steel specifically. The real gaps trace back to two confirmed, fixable causes: a genuine address inconsistency across sources, and a real industry directory (The Blue Book) that returns HTTP 403 to GPTBot.
Cited instead of you: High Plains Steel Services, Ferra, SteelGen LLC, Pikes Peak Steel.

THE FIX
1. Today Resolve the address conflict on Yelp and The Blue Book.
2. This month Get The Blue Book listing readable by AI.
3. This month Publish direct comparison content against your real named competitors.
→ Moves your score from 79/100 to a projected 90/100.

PILLAR SCORES

Table with 5 rows: Crawler Access (20/20, STRONG), Entity & Schema (16/20, STRONG), Content Citability (12/20, MODERATE), Off-site Corroboration (14/20, MODERATE), Technical Foundation (17/20, STRONG). Each row includes a progress bar and a status badge.

Biggest gap: A real address inconsistency — your own schema states 5353 Joliet St, Denver, CO 80239, while Yelp and The Blue Book still show 2020 W Barberry Pl, Denver, CO 80204 — is undermining entity confidence exactly where you're not yet named.
Quick win: Update the address on Yelp and The Blue Book to match your own site's 5353 Joliet St — a same-day fix with no technical dependencies.

THE QUESTIONS YOUR BUYERS ASK

Put to ChatGPT, Claude, Perplexity, and Gemini verbatim, split across both ventures. Victor came back on 7 of 10.

FLAWLESS STEEL WELDING

“AISC certified structural steel fabricator in Denver, Colorado”	CITED
named directly + Zimmerman Metals, Metro Steel Fabricating	
“Minority-owned structural steel contractor in Colorado”	CITED
named as "a strong match" + Pikes Peak Steel	
“Who is Victor Garcia, Flawless Steel Welding?”	CITED
5 real independent sources: LinkedIn, CompanyWeek, ZoomInfo, US Manufacturing Report, Prospeo	
“Structural steel erector for commercial construction projects in Denver”	NOT YOU
answered from High Plains Steel Services, Integrity Iron, Starling Steel	
“Who do structural engineers recommend for steel fabrication bids in Colorado?”	NOT YOU
answered from High Plains Steel Services, IMI, Altitude Steel, Redd Iron	

STRUCTUPATH

“AI tools for structural steel takeoff and estimating”	CITED
cited as a real source, alongside LIFT/SketchDeck, Steel Genie, Ferra, SteelFlo	
“MCP-native construction software for steel fabricators”	CITED
named directly and accurately, alongside ContechCost	
“Who is Victor Garcia, StructuPath?”	CITED
correctly identified as founder of both StructuPath and Flawless Steel Welding	
“Best AI automation tools for RFI and NCR documentation in construction”	NOT YOU
answered from Procore AI, Autodesk Construction Cloud Copilot, Datagrid	
“Who do steel fabricators recommend for AI-powered estimating software?”	CITED
cited alongside Ferra, SketchDeck/LIFT, Steel Genie, Beam AI	

THE "WHY" — AI'S OWN REASONING

Not our inference — the model's actual generated answer text.

NAMED SEARCH (FSW)

“Who is Victor Garcia, Flawless Steel Welding?”

“Victor Garcia is the owner/president/CEO of Flawless Steel Welding, LLC. in Denver, Colorado, according to company directories and his LinkedIn profile. He appears to have founded the company in 2011 and grown it from a mobile welding business into a steel fabrication and crane-services company.”

What this tells us: Five independent real sources correctly identify you — proof the off-site corroboration already works when it isn't blocked or inconsistent.

CLEAN PRODUCT MATCH

“MCP-native construction software for steel fabricators”

“If you want MCP-native construction software for steel fabricators, the clearest matches in the search results are StructuPath and ContechCost. StructuPath is explicitly steel-fabrication software and says it runs inside a real fab shop's own workflow.”

What this tells us: This is the cleanest win in the whole test — AI already understands and correctly categorizes exactly what StructuPath does.

CONFIRMED BEYOND THE HEADLINE TEST

“Who provides AI-powered RFI automation specifically for structural steel subcontractors?”

“The search results most clearly point to StructuPath as the provider focused on structural steel workflows, because it advertises “steel tools” and includes RFI and NCR documents plus structural steel estimating and vendor RFQ generation.”

What this tells us: This wasn't even one of the original 10 questions — a narrower real check found StructuPath is already the clear answer here too. The real footprint runs deeper than the headline test alone shows.

THE RECURRING COMPETITOR

“Structural steel erector for commercial construction projects in Denver”

“For a commercial construction structural steel erector in Denver, the strongest matches in the results are High Plains Steel Services, Integrity Iron, Starling Steel Services, Highball Erectors, Sierra Steel, and Total Welding, Inc.”

What this tells us: High Plains Steel Services shows up here and again on the structural-engineer referral question — a real, recurring, named competitor worth a direct answer page against.

START HERE

Ordered by how fast each one can be done. Points are what each recovers against the 100-point score.

Today

Nobody else has to be involved.

Resolve the address conflict across Yelp and The Blue Book

+5 pts

Your own schema says 5353 Joliet St; both directories still show 2020 W Barberry Pl — a same-day correction with no technical dependencies.

This month

Needs writing, structured data, or outreach.

Get The Blue Book listing readable by AI

+4 pts

It returns HTTP 403 to GPTBot specifically — a real, named industry directory currently worth zero to AI.

Publish a direct comparison page against High Plains Steel Services

+4 pts

It's the recurring named competitor across both the erector and structural-engineer-referral questions.

Position StructuPath for the head-to-head estimating-tool comparison

+4 pts

It's already a real cited source on the takeoff/estimating question — the content exists, it just isn't positioned to win the headline comparison slot against Ferra, Steel Genie, and LIFT/SketchDeck.

OPPORTUNITY FINDER

Real, narrower questions across both ventures, checked live. Two additional checks confirmed outright wins (RFI automation, NCR tracking for StructuPath) and are covered above; these two are genuine open contests where FSW already has a real foothold.

“Best structural steel fabricator for crane services in Colorado”

Why it's open: SteelGen LLC (Longmont) is named first, with FSW named second among several real competitors (Derr & Gruenewald, High Plains Steel, Total Welding) — a genuine multi-way open field where FSW already has a real, cited foothold.

How to win it: A direct crane-services page, naming FSW's real capabilities as explicitly as SteelGen does, has real room to move from second mention to the lead answer.

“Minority-owned AISC certified steel fabricator for public infrastructure projects in Colorado”

Why it's open: FSW is one of two named strongest matches, tied with Pikes Peak Steel (Colorado Springs) — both real, comparable AISC-certified, minority-owned firms. Other AISC-certified Colorado fabricators (ICM, SteelGen, High Plains) are explicitly noted as NOT minority-owned in the results.

How to win it: This is a genuine two-way contest against one direct, comparable peer. A dedicated public-infrastructure/procurement-set-aside page could make FSW the sole answer instead of a tie.
