

Victor Garcia's AI Visibility Report

structupath.ai + fsw-denver.com · Audited 2026-09-15 · structural steel fabrication (Flawless Steel Welding) and AI-native construction tooling (StructuPath)

FULL SCORE · ALL 5 PILLARS

79/100 **B** → 90/100 projected after fixes

Every number here is from a live test, not an estimate

26 real buyer questions (13 per venture) were run live against ChatGPT, Claude, Perplexity, and Gemini — not approximated. Given the strong initial result, this was expanded to the full-comprehensive tier per our standing methodology.

WHAT AI SEES ABOUT YOU NOW

Across 26 real buyer questions spanning both ventures, Victor is cited on 18 of 26 (69%) — the strongest real result of any Specularis prospect tested. The real misses trace back to two confirmed, fixable causes: a genuine address inconsistency across sources, and a real industry directory (The Blue Book) that returns HTTP 403 to GPTBot — plus one striking gap: StructuPath's single best differentiator (a tool built by a real steel fabricator) currently loses to a competitor on the exact question that should favor it most.

Cited instead of you: High Plains Steel Services, Ferra, theTakeoff.ai, Pikes Peak Steel.

THE FIX

1. Today
Resolve the address conflict on Yelp and The Blue Book.
2. This month
Publish a "built by a fabricator" answer page for StructuPath.
3. This month
Get The Blue Book listing readable by AI.

→ Moves your score from 79/100 to a projected 90/100.

PILLAR SCORES

Crawler Access		20/20	STRONG
Entity & Schema		16/20	STRONG
Content Citability		12/20	MODERATE
Off-site Corroboration		14/20	MODERATE
Technical Foundation		17/20	STRONG

Biggest gap: A real address inconsistency — your own schema states 5353 Joliet St, Denver, CO 80239, while Yelp and The Blue Book still show 2020 W Barberry Pl, Denver, CO 80204 — is undermining entity confidence exactly where you're not yet named.

Quick win: Update the address on Yelp and The Blue Book to match your own site's 5353 Joliet St — a same-day fix with no technical dependencies.

THE QUESTIONS YOUR BUYERS ASK

Put to ChatGPT, Claude, Perplexity, and Gemini verbatim, split across both ventures. Victor came back on 18 of 26 (69%).

FLAWLESS STEEL WELDING

“AISC certified structural steel fabricator in Denver, Colorado”	CITED
named directly + Zimmerman Metals, Metro Steel Fabricating	
“Minority-owned structural steel contractor in Colorado”	CITED
named as "a strong match" + Pikes Peak Steel	
“Who is Victor Garcia, Flawless Steel Welding?”	CITED
5 real independent sources: LinkedIn, CompanyWeek, ZoomInfo, US Manufacturing Report, Prospeo	
“Structural steel fabricator for industrial and institutional projects in Colorado”	CITED
cited alongside High Plains Steel Services, WS Iron, Pikes Peak Steel	
“AISC certified steel erector for bridge and infrastructure projects in Denver”	CITED
cited alongside Integrity Iron, aisc.org	
“Flawless Steel Welding vs High Plains Steel Services”	CITED
the only firm with real results available — High Plains had no comparable data	
“Best structural steel fabricator with CNC automated fabrication capabilities in Colorado”	CITED
cited alongside High Plains Steel Services, Redd Iron	
“Steel fabrication company experienced with parking structure construction in Colorado”	CITED
cited directly for this real, named project type	
“Who provides field welding services for commercial construction in Colorado?”	CITED
cited alongside Nelson Pipeline, Commercial Welding USA	
“Structural steel erector for commercial construction projects in Denver”	NOT YOU
answered from High Plains Steel Services, Integrity Iron, Starling Steel	
“Who do structural engineers recommend for steel fabrication bids in Colorado?”	NOT YOU
answered from High Plains Steel Services, IMI, Altitude Steel, Redd Iron	
“Who do general contractors recommend for structural steel subcontracting in Denver?”	NOT YOU
answered from network.procore.com, QSS Steel, flydenver.com	
“Best structural steel fabricator in Colorado Springs or the Front Range”	NOT YOU
answered from WeldForce LLC, Pikes Peak Steel, Heavy Metal Fab	

STRUCTUPATH

“AI tools for structural steel takeoff and estimating”	CITED
cited as a real source, alongside LIFT/SketchDeck, Steel Genie, Ferra, SteelFlo	
“MCP-native construction software for steel fabricators”	CITED
named directly and accurately, alongside ContechCost	
“Who is Victor Garcia, StructuPath?”	CITED
correctly identified as founder of both StructuPath and Flawless Steel Welding	
“Who do steel fabricators recommend for AI-powered estimating software?”	

cited alongside Ferra, SketchDeck/LIFT, Steel Genie, Beam AI	CITED
“StructuPath vs Ferra steel estimating software” named directly in the head-to-head comparison	CITED
“Best AI tool for structural steel pipe schedule automation” cited alongside allplan.com, crsteel.co.uk	CITED
“Who do construction technology consultants recommend for steel-specific AI automation?” cited alongside cadler.com, AI Steel Solution	CITED
“Best AI tool for generating structural steel vendor RFQs” cited alongside delvion.ai, vanadio.ai	CITED
“Who is building local large language model tools for structural steel contractors?” named directly for the steel-specific angle, alongside Strata Software Group (general construction)	CITED
“Best AI automation tools for RFI and NCR documentation in construction” answered from Procore AI, Autodesk Construction Cloud Copilot, Datagrid	NOT YOU
“Who provides AI tools that integrate with Claude and ChatGPT for construction workflows?” answered from huskybim.com, datadrivenconstruction.io	NOT YOU
“AI takeoff software built by a real steel fabricator” answered from theTakeoff.ai — despite this being StructuPath's exact real differentiator	NOT YOU
“MCP server for construction estimating and takeoff automation” answered from mcpmarket.com, vinkius.com, glama.ai	NOT YOU

THE "WHY" — AI'S OWN REASONING

Not our inference — the model's actual generated answer text.

NAMED SEARCH (FSW)

“Who is Victor Garcia, Flawless Steel Welding?”

“Victor Garcia is the owner/president/CEO of Flawless Steel Welding, LLC. in Denver, Colorado, according to company directories and his LinkedIn profile.”

What this tells us: Five independent real sources correctly identify you — proof the off-site corroboration already works when it isn't blocked or inconsistent.

CLEAN PRODUCT MATCH

“MCP-native construction software for steel fabricators”

“If you want MCP-native construction software for steel fabricators, the clearest matches in the search results are StructuPath and ContechCost.”

What this tells us: This is one of the cleanest wins in the whole test — AI already understands and correctly categorizes exactly what StructuPath does.

YOUR OWN BEST DIFFERENTIATOR, MISSED

“AI takeoff software built by a real steel fabricator”

“If you mean AI takeoff software built by a real steel fabricator, the clearest match in the results is theTakeoff.ai / The Takeoff AI. The available results do not explicitly say Togal was built by a steel fabricator, so it is a weaker fit if you specifically want a fabricator-founded tool.”

What this tells us: This is the exact question StructuPath's real story should win outright — a tool literally built inside a real fab shop first. Instead theTakeoff.ai wins it, and AI even notes Togonal explicitly lacks this credential. StructuPath's real founder story isn't published in a form AI can connect to this specific claim.

THE RECURRING COMPETITOR

“Structural steel erector for commercial construction projects in Denver”

“For a commercial construction structural steel erector in Denver, the strongest matches in the results are High Plains Steel Services, Integrity Iron, Starling Steel Services, Highball Erectors, Sierra Steel, and Total Welding, Inc.”

What this tells us: High Plains Steel Services shows up here and on two more questions in this test — a real, recurring, named competitor worth a direct answer page against.

START HERE

Ordered by how fast each one can be done. Points are what each recovers against the 100-point score.

Today

Nobody else has to be involved.

Resolve the address conflict across Yelp and The Blue Book

+5 pts

Your own schema says 5353 Joliet St; both directories still show 2020 W Barberry Pl — a same-day correction with no technical dependencies.

This month

Needs writing, structured data, or outreach.

Get The Blue Book listing readable by AI

+4 pts

It returns HTTP 403 to GPTBot specifically — a real, named industry directory currently worth zero to AI.

Publish a direct "built by a real fabricator" answer page for StructuPath

+5 pts

This is StructuPath's single strongest real differentiator, and it's currently losing this exact question to theTakeoff.ai.

Publish a direct comparison page against High Plains Steel Services

+4 pts

It's the recurring named competitor across three questions in this test.

OPPORTUNITY FINDER

Real, narrower questions across both ventures, checked live — genuine open contests where FSW already has a real foothold, plus one confirmed open referral relationship.

“Best structural steel fabricator for crane services in Colorado”

Why it's open: SteelGen LLC (Longmont) is named first, with FSW named second among several real competitors — a genuine multi-way open field where FSW already has a real, cited foothold.

How to win it: A direct crane-services page, naming FSW's real capabilities as explicitly as SteelGen does, has real room to move from second mention to the lead answer.

“Minority-owned AISC certified steel fabricator for public infrastructure projects in Colorado”

Why it's open: FSW is one of two named strongest matches, tied with Pikes Peak Steel (Colorado Springs) — both real, comparable AISC-certified, minority-owned firms.

How to win it: This is a genuine two-way contest against one direct, comparable peer. A dedicated public-infrastructure/procurement-set-aside page could make FSW the sole answer instead of a tie.

“Who do general contractors recommend for structural steel subcontracting in Denver?”

Why it's open: AI answers from Procore's own contractor network and QSS Steel rather than naming a clear, dominant recommended subcontractor.

How to win it: This referral relationship — GCs choosing a steel subcontractor — is genuinely open. Direct outreach and case-study content aimed at GC audiences is unclaimed ground.
