

H2O International's AI Visibility Report

Prepared for Guillermo Guzman, Founder & CEO · h2oinhome.com (scored) · internationalh2o.com · h2ofilter.com · Audited 2026-10-02 · whole-house water filtration & treatment, South Florida (Miami-Dade, Broward, Palm Beach)

FULL SCORE · ALL 5 PILLARS · H2OINHOME.COM

56/100

C

→ 79/100 projected after fixes

Every number here is from a live test, not an estimate

14 real buyer questions — 10 for H2O In Home (homeowners and the people who refer them), 2 for commercial coolers, 2 for the manufacturing side — were put to **ChatGPT, Claude, Perplexity and Gemini** twice on 2026-10-02 and the answers read in full. An engine counts as citing you if it did in either run; engines occasionally time out, so a missing answer is shown as not tested, not as not cited. Where our automated classifier and the answer text disagreed, we went with the text. The questions come from how H2O actually earns money: free in-home test → whole-house system → \$0-down PACE financing, plus the realtors and plumbers who refer homeowners.

WHAT AI SEES ABOUT YOU NOW

Where a homeowner asks AI for a company, a free water test, or \$0-down financing, **H2O In Home shows up — cited on 5 of 10 questions**. It disappears at the two places the sale is actually decided earlier: **hard-water / Biscayne Aquifer and softener questions (0 of 3)** and **both referral questions from realtors and plumbers (never named; one Gemini source link on the realtor question)**. **Claude cited H2O on none of the 12 questions it answered**. Commercial coolers: 0 of 2. The manufacturer, H2O International, is named on 1 of 2 — but through third-party listings, not its own site. Ask AI who Guillermo Guzman is and it finds h2ofilter.com and LinkedIn, but never connects him to H2O In Home.

Cited instead of you: Hydrality, Eagle Water Corp, Miami Water & Air, Atlantic Filter Corp, Erica's Plumbing, Sunshine State Water Pros, Nature's Best, Culligan Quench, Water Boy, Water Science US.

THE FIX

1. Today

Add sameAs links and Guillermo as founder to your existing schema, and mark up the FAQ that is already on the page.

→ Moves your score from 56/100 to a projected 79/100.

2. This month

Pre-render the site so the content is in the raw HTML, and return real 404s.

3. This month

Build review/listing proof for the H2O In Home name, and publish pages for the real openings below.

PILLAR SCORES

Crawler Access		17/20	STRONG
Entity & Schema		11/20	MODERATE
Content Citability		11/20	MODERATE
Off-site Corroboration		9/20	MODERATE
Technical Foundation		8/20	MODERATE

Biggest gap: h2oinhome.com is a JavaScript app. A crawler that runs JavaScript sees a strong page (about 2,100 words, an H1, a meta description, a canonical, LocalBusiness schema, an FAQ). A crawler that doesn't sees **22 words and nothing else** — the same 4,742-byte shell for GPTBot, ClaudeBot, PerplexityBot and Googlebot. The engines we tested clearly do render it (they cited you on 5 questions), so this is a fragility, not a blackout — but every non-rendering crawler is blind, and every missing path returns HTTP 200, so bots can't tell a real page from an empty one.

Quick win: your schema has no sameAs and no founder, and your FAQ has no FAQPage markup. Both are an hour of work.

Your other two sites

internationalh2o.com (Wix): open to every AI bot; 719 words; only a bare WebSite schema; robots.txt points to a sitemap that returns 404. **h2ofilter.com** (WordPress): your strongest site on paper — 3,602 words, real FAQPage schema, working sitemap, and the page that states the 1993 founding by Guillermo Guzman. Its Organization schema carries only a name, URL and logo (no address, founder or sameAs), and it returns 403 to Bytespider and to bare-browser user agents.

THE QUESTIONS YOUR BUYERS ASK

Put verbatim. H2O In Home came back on 5 of 10 (3 named, 2 source-only); internationalh2o.com on 0 of 2; h2ofilter.com on 1 of 2 (named, not via its own site). Put to ChatGPT, Claude, Perplexity and Gemini, twice.

H2O IN HOME — HOMEOWNERS (H2OINHOME.COM)

“Who is the best whole house water filtration company in Miami?”

NAMED

named alongside Hydrality and Eagle Water Corp

“What is the best whole house water filter for the hard water and Biscayne Aquifer water in Miami-Dade?”

NOT YOU

answered from Clearwater Home Lab, Miami Water & Air, Aqua Water Tech

“Do I need a PFAS filter for my home in Miami-Dade or Broward, and who installs them?”

NOT YOU

answered from WaterLux, SoFlo Water Pros, Miami-Dade County, Miami Herald

“Who installs water softeners and whole house water treatment in Broward County?”

NOT YOU

answered from Erica's Plumbing, Sunshine State Water Pros, Johns Plumbing

“Who offers a free in-home water test in Miami-Dade or Palm Beach County?”

NAMED

named first, ahead of SoFlo Water Pros, HydraGen Essentials, Crystal Flow Miami

“Can I finance a whole house water filtration system with \$0 down in Florida (PACE financing)?”

SOURCE ONLY

your site is a cited source, but the answer is built from Florida PACE rules and never names H2O

“Is H2O In Home in Miami a legitimate water treatment company? Reviews?”

NAMED

named, with a caveat: “no strong independent review coverage”

“Who is Guillermo Guzman, founder of H2O International in South Florida?”

NOT YOU

answered from h2ofilter.com, LinkedIn, Alexander Hutton — H2O In Home never connected

“I'm a Miami real estate agent and my buyers' home inspection flagged water quality issues. Which local water treatment company can I refer them to?”

SOURCE ONLY

referral question: Gemini used your site as a source in one of two runs, but the answer names Miami Water & Air, Culligan Miramar, Sunny Bliss

“I'm a South Florida plumber and customers keep asking about whole house filtration. Which local water treatment company is a good partner to refer them to?”

NOT YOU

referral question: Atlantic Filter Corp, Miami Hydro Technologies, Aqualine

COMMERCIAL COOLERS (INTERNATIONALH2O.COM)

“Who supplies commercial water coolers and office water filtration in Miami?”

NOT YOU

answered from Nature's Best, Culligan Quench, Acqua Fresca, Water Boy, Cintas

“Who can service water coolers and commercial water filtration for businesses in South Florida?”

NOT YOU

answered from Water Boy, Nature's Best, Acqua Fresca, Aroma Coffee Service

MANUFACTURER (H2OFILTER.COM)

“Which companies manufacture water filtration systems in South Florida?”

NAMED (via listings)

“H2O International Inc. — Deerfield Beach — listed as a manufacturer,” sourced from LinkedIn and IQS Directory, not h2ofilter.com

THE “WHY” — AI'S OWN REASONING

Not our inference — the models' actual generated answer text.

CITED, BUT WITH A CAVEAT

“Is H2O In Home in Miami a legitimate water treatment company? Reviews?”

“H2O In Home appears to be a real local water treatment business in Miami ... The company's own site is the main source for its legitimacy claims, so those details are self-reported ... I did not find strong independent review coverage in the results.”

What this tells us: AI trusts you enough to name you, but the proof is all your own. Your sister company International H2O has 21 five-star Birdeye reviews; the in-home brand has none that AI can find. That's the cheapest trust gap on this page to close.

THE REFERRAL QUESTION, MISSED

“I'm a South Florida plumber and customers keep asking about whole house filtration. Which local water treatment company is a good partner to refer them to?”

“A strong referral partner for whole-house filtration in South Florida is Atlantic Filter Corporation ... serving South Florida since 1955.”

What this tells us: Atlantic Filter wins on one fact it states plainly: how long it has served the region. H2O has a stronger fact — it manufactures the systems in Deerfield Beach — and no page that says so to a plumber or realtor. That referral channel is currently unclaimed by you.

THE HARD-WATER QUESTION, MISSED

“What is the best whole house water filter for the hard water and Biscayne Aquifer water in Miami-Dade?”

“The best setup is usually a salt-based whole-house water softener plus a whole-house carbon filter rather than a filter alone ... Miami water is reported as moderately hard to hard.”

What this tells us: AI is answering with a category (softener + carbon), then listing sources that explain it plainly. Your site mentions the Biscayne Aquifer, but not in the answer-first form AI quotes. The fix is a page that answers this exact question in its first two sentences.

START HERE

Ordered by how fast each can be done. Points are what each recovers against the 100-point score.

Today

Nobody else has to be involved.

Add sameAs and Guillermo as founder to the existing JSON-LD

+3 pts

Link the LinkedIn company page, Birdeye, BBB and Facebook; add Guillermo Guzman (founder, 1993) so AI can connect H2O In Home to him.

Mark up the FAQ you already have as FAQPage schema

+3 pts

The content is on the page; the markup isn't.

This month

Needs development, outreach, or writing.

Pre-render the site and return real 404s

+8 pts

Serve the content in the raw HTML (SSR or static pre-rendering) so crawlers that don't run JavaScript can read it, and stop returning HTTP 200 for pages that don't exist.

Build independent proof for the H2O In Home name

+6 pts

Claim the Google Business Profile and BBB profile under the in-home brand, collect reviews on Birdeye as International H2O already has, and link all three sites to each other.

Publish direct pages for the 8 openings below

+3 pts

Referral (realtor / plumber), PFAS, softener-vs-filter, condo/HOA, shower filter, and county-specific pages, each opening with the answer.

OPPORTUNITY FINDER

Real, narrower questions in H2O's exact niche, checked live and scored for how uncontested the answer is. 8 of 8 candidates tested came back genuinely open (58–60 on a 0–100 openness score).

“Who can I refer my real estate clients to for whole house water filtration in South Florida?”

Why it's open: AI lists Biscayne Water, Perfectly Clear, Golden Touch Water and others with no clear first choice — and none is a manufacturer.

How to win it: A page for realtors and home inspectors: what to do when an inspection flags water, a one-page buyer handout, and the fact that H2O builds the systems itself.

“Best shower filter for Florida chlorine water”

Why it's open: AI answers from review sites (Wired, Good Housekeeping) and recommends products like Weddell Duo and Aquasana — and says the best design is KDF-55 plus carbon. No manufacturer is named.

How to win it: H2O International makes KDF shower filters. Publish a page on your Chlorigone / KDF line that states the design in AI's own terms, with any NSF/ANSI certification you actually hold.

“Best PFAS water filter for home in South Florida”

Why it's open: AI recommends consumer products (APEC, Aquasana) from testing sites and names no local installer.

How to win it: A South Florida PFAS page tying your H2O-210 RO and nano-positronic systems to the utility's own PFAS reports, with the certifications behind each claim.

“Do I need a water softener or a water filter in Florida?”

Why it's open: AI gives generic advice from plumbing and cooling sites and names no water-treatment business.

How to win it: An answer-first explainer using Biscayne hardness numbers, ending in your free in-home test.

“Water treatment for condos and HOAs in Miami-Dade”

Why it's open: AI describes the setup (under-sink RO for condos, building-wide systems for HOAs) and names no business.

h2oinhome.com is already among its sources, so you are one page from being the answer.

How to win it: A condo and HOA page: approval and shared-plumbing rules, and multi-unit systems built at your own Deerfield Beach factory.

“Best water filtration company in Palm Beach County”

Why it's open: AI picks Perfectly Clear Water Filtration (30+ years) and Simple Water Service (15,000+ installs), but with no dominant source behind either.

How to win it: A Palm Beach County page with your install counts, address and licensing — the kind of specifics your Miami page already carries.

“Best reverse osmosis drinking water system installer in Fort Lauderdale”

Why it's open: AI names Pure Water Pro, Reverse Osmosis Watermakers of South Florida and Leaf Home; no one source dominates.

How to win it: A Broward RO page for the H2O-210 and under-sink systems, with a Fort Lauderdale service area and install proof.

“Water testing companies for home well or city water in Broward County”

Why it's open: AI points to the county utility and a mix of labs and mold inspectors; no water-treatment company is the answer.

How to win it: A free in-home test page listing the 15+ contaminants you test for and a sample report, scoped to Broward.
