

DoCurious's AI Visibility Report

docurious.com · Audited 2026-09-14 · a two-sided marketplace for goal-oriented, real-life challenges

FULL SCORE · ALL 5 PILLARS

67/100 **C** → 82/100 projected after fixes

Every number here is from a live test, not an estimate

The five pillars below were measured directly. The buyer-question results below came from live calls to ChatGPT, Claude, Perplexity, and Gemini — not approximated.

WHAT AI SEES ABOUT YOU NOW

Across 10 real buyer questions, DoCurious is cited on 4 of 10 — but only when the question happens to closely echo DoCurious's own marketing language (“goal-oriented challenge marketplace,” “like Airbnb Experiences but for challenges”). On every question phrased the way a real buyer would naturally ask it — a bucket-list app with accountability, local confidence-building challenges, positive-psychology apps — DoCurious is never named, and well-known competitors are.

Cited instead of you: one sec, Forest, Happify, SuperBetter.

THE FIX

- | | | |
|--|---|---|
| 1. Today
Add FAQPage schema to the existing, real FAQ content. | 2. This month
Add Person + Organization schema for Douglas and DoCurious. | 3. This month
Rewrite key pages in the language real buyers actually use. |
|--|---|---|

→ Moves your score from 67/100 to a projected 82/100.

PILLAR SCORES

Crawler Access		20/20	STRONG
Entity & Schema		7/20	CRITICAL
Content Citability		10/20	MODERATE
Off-site Corroboration		15/20	MODERATE
Technical Foundation		15/20	MODERATE

Biggest gap: Zero structured Person/Organization schema for Douglas Perednia, despite a genuinely differentiated, real founder story (MD, telemedicine pioneer, NIH/HHS-funded research) that AI currently can't read as data.

Quick win: Add FAQPage schema to the existing FAQ page — real Q&A content already exists, it's just not machine-readable as such.

THE QUESTIONS YOUR BUYERS ASK

Put to ChatGPT, Claude, Perplexity, and Gemini verbatim (not every engine answered every question). DoCurious came back on 4 of 10.

“Best app to get off my phone and do real-life challenges”

NOT YOU

answered from one sec, Forest — app.apple.com, top10.com

“Goal-oriented challenge marketplace for teens and screen addiction”

CITED

named as a strong fit — alongside collabmind.in, mindsumo.com

“Who is Douglas Perednia, DoCurious?”

CITED

your own profile + f6s.com, rocketreach.co

“DoCurious vs Bucket List Maker”

CITED

your own comparison + apps.apple.com

“Best bucket list app with real accountability, not just a checklist”

NOT YOU

answered from Serenity, GoalsWon, BucketPal

“Platforms connecting people with vetted real-world experience providers”

NOT YOU

answered from Airbnb Services, Viator, Toptal, Fiverr Pro

“How do I find local challenges or experiences to build confidence?”

NOT YOU

answered from reddit.com, community centers/libraries, mind.org.uk

“Top platforms schools use to build student resilience through real-world challenges”

NOT YOU

answered from eschoolnews.com, talkcampus.com, zipdo.co

“Apps that use positive psychology to improve mental health through real activities”

NOT YOU

answered from Happify, SuperBetter, Reflectly, PositiVibe

“Marketplace for goal-oriented real-life experiences, like Airbnb Experiences but for challenges”

CITED

your own positioning + Airbnb Experiences, coexperiences.com

THE "WHY" — AI'S OWN REASONING

Not our inference — the model's actual generated answer text.

YOUR OWN LANGUAGE WINS

“Marketplace for goal-oriented real-life experiences, like Airbnb Experiences but for challenges”

“A close match is DoCurious: it describes itself as “the world’s first marketplace for real-life, goal-oriented challenges” and a “hub for real-world activities,” which is much closer to Airbnb Experiences, but for challenges than a general events marketplace.”

What this tells us: When a buyer's phrasing happens to echo DoCurious's own marketing copy almost word-for-word, AI finds and cites it correctly. That's the whole pattern — it only works when the words match.

NAMED SEARCH

“Who is Douglas Perednia, DoCurious?”

“Douglas Perednia, MD, is the founder and CEO/president of DoCurious, a company focused on getting people off screens and into real-world, goal-oriented challenges. He is described as a physician, entrepreneur, and former NIH/HHS-funded telemedicine researcher.”

What this tells us: AI gets the founder story right and in real detail — proof the content works when it's readable. It's just not structured or linked anywhere else on the site.

DIFFERENT WORDS, DIFFERENT ANSWER

“Best app to get off my phone and do real-life challenges”

“If you want the best app to get off your phone and do real-life challenges, I'd pick one sec for the fastest behavior change, and Forest if you want a more game-like challenge to stay away from your phone.”

What this tells us: Same underlying intent as DoCurious's own pitch, phrased the way a real buyer would actually type it — and AI reaches for two well-known phone-habit apps instead. DoCurious isn't in the running because its own site never uses this buyer's words.

DIFFERENT WORDS, DIFFERENT ANSWER

“Apps that use positive psychology to improve mental health through real activities”

“Apps that use positive psychology to improve mental health through real activities include Happify, SuperBetter, Reflectly, and PositiVibe. These apps typically use exercises such as gratitude journaling, acts of kindness, strengths practice, and goal setting.”

What this tells us: DoCurious's own site describes real positive-psychology research behind the product, but never in these exact clinical terms — so when a buyer asks in this language, AI reaches for apps that do use it.

START HERE

Ordered by how fast each one can be done. Points are what each recovers against the 100-point score.

Today

Nobody else has to be involved.

Add FAQPage schema to the existing FAQ content

+4 pts

Real Q&A content already exists on the site — it's just not machine-readable as such.

This month

Needs writing, structured data, or outreach.

Add Person + Organization JSON-LD schema for Douglas and DoCurious

+10 pts

Link to LinkedIn, F6S, and press — the single biggest lever on the score.

Rewrite key pages in the exact language real buyers use

+8 pts

AI only cites DoCurious when a question echoes its own marketing copy — add the phrasing buyers actually type (bucket list, accountability, local challenges, positive psychology).

Confirm and publish the real, differentiated competitor comparison

+5 pts

DoCurious vs. bucket-list apps, phone-habit apps, and positive-psychology apps — own the comparison instead of losing it by default.

PILLAR-BY-PILLAR BREAKDOWN

CRAWLER ACCESS · 20/20

STRONG

Finding: robots.txt open (sitemap declared); GPTBot, ClaudeBot, CCBot, PerplexityBot, and Google-Extended all HTTP 200 at the real (www) host. Only Bytespider (minor, non-major-engine) is blocked.

Fix: No fix needed here — this pillar is already maxed out.

ENTITY & SCHEMA · 7/20

CRITICAL

Finding: Zero JSON-LD anywhere on the homepage. Douglas Perednia's MD/telemedicine-pioneer bio on /about-us is genuinely detailed — just entirely unstructured. No Person/Organization schema, no sameAs, no linked graph.

Fix: Add a linked Person + Organization JSON-LD graph for Douglas and DoCurious, with sameAs to LinkedIn, F6S, and press.

CONTENT CITABILITY · 10/20

MODERATE

Finding: Real content exists: homepage ~886 words, a genuine FAQ page with 4 real categories. Not answer-first, no FAQPage schema despite the format begging for it.

Fix: Add FAQPage schema to the existing FAQ content — it's already structured as real Q&A, just not machine-readable as such.

OFF-SITE CORROBORATION · 15/20

MODERATE

Finding: Solid: LinkedIn (personal + company), F6S, KGW News (real Portland TV press on the Global Health Initiative win), The Org, Gusher, Alignable.

Fix: Link these existing, verified profiles into the new schema so AI can connect them to the entity.

TECHNICAL FOUNDATION · 15/20

MODERATE

Finding: Webflow (clean, modern platform). Sitemap.xml live. Meta description and OG/Twitter tags present and well-written.

Fix: Already solid — no urgent technical work needed.
